

Swiss Online Matura

Admission to the university of your choice in one year!

This one-year online Matura course will provide you with the best possible preparation to pass the Swiss Matura exam. Focused on your academic success - Individual, affordable and flexible.

Strengths

Teaching staff: Highly qualified team of teachers

Live lessons: Daily participation in digital classroom lessons and extensive possibilities to interact with the teachers and other course participants via the e-learning user interface (live chat/live videoconference)

Curriculum: 100% planning certainty and practical consolidation

Individual supervision: Regular supervision meetings and free extra tuition, collaboration with trained learning coaches and specialist psychologists from IFiPP Switzerland, fully supervised Matura project work

E-learning: Comprehensive, school-internal e-learning platform (complete theory, overview of subject matter and exams, all exercise sheets including sample solutions, past Matura exams with sample solutions in all subjects)

Unlimited correction service: Possibility to submit independently completed (past) Matura exams and independently written essays with full correction, as well as the relevant marking and feedback at Matura level

Mock exam weeks: Two complete mock Matura exams including correction, feedback and discussion for ideal exam preparation

Video material: Recorded lectures in HD quality, learning videos with summaries of the subject matter, maths and physics problems including sample solutions

Free refresher course: For those who have to resit the exam

Facts

From/to:
23 August 2021 to 15 July 2022

Duration:
2 semesters

Lesson times (online):
Monday to Friday: 8.30 a.m. to 4.00 p.m.

Target group and prerequisites

Secondary school students, grammar school students, employed persons, pupils and students from abroad.

Students must reach the age of majority (18 years) in the same year as the second partial exam. Students must also demonstrate motivation and perseverance as well as confident mastery of languages and scientific and mathematical subjects.

To ensure that this is the appropriate path for each student, we assess the level of all applicants.

Basic competences required include resilience and perseverance as well as sound linguistic proficiency in German, English and an additional national language (French or Italian), and basic skills in maths.

Learning objectives

The acquisition of comprehensive general knowledge with high practical relevance, ideal for starting a university course. The acquisition of sound knowledge for handling scientific and mathematical problems. The acquisition of linguistic skills at Matura level facilitates both university studies and the completion of any further language certificates.

Course content

Basic subjects:
